SUPAJUMBOPROP

**CAUTION**

1. Before use check prop is complete
2. Make sure you are using the right prop for your site panel
3. Read and understand the safe working loads on the label of the prop as they can change the right prop for the load required
4. Check load limits with your supervisor
5. It is not considered practicable or safe to allow props to fall on the ground and it is highly recommended that props be raised and lowered in a controlled fashion using appropriate lifting gear and procedures.

**Australian Owned & Designed**
